

ALI HAROON

Aspiring Web Developer — Node.js / JavaScript

+92 3080889090 • aliharoon0111@gmail.com • [linkedin.com/in/aliharoon](https://www.linkedin.com/in/aliharoon) • github.com/AliHaroon111 • [Ali Haroon Portfolio](#) • Sahiwal, Punjab, Pakistan

ABOUT ME

Third-year Computer Science student at COMSATS University (6th Semester) with hands-on experience building secure, scalable web applications using Node.js and JavaScript. Skilled in backend architecture and frontend fundamentals. Eager to contribute to Nestle’s digital initiatives through collaborative problem-solving, teamwork, and full-stack development as part of the Nesternship internship program.

TECHNICAL SKILLS

- Backend:** Node.js, Express.js, RESTful API Design, Middleware Architecture, Controller-Service patterns
- Frontend:** HTML5, CSS3, Vanilla JavaScript (ES6+), DOM Manipulation, Event Loops, Async/Await
- Database & Security:** MongoDB (Mongoose), JWT (Access/Refresh Tokens), Bcrypt, CORS
- Workflow Automation:** n8n (API Integrations, Webhooks, AI Pipelines, JSON)
- Tools & Languages:** Git, Postman, Nodemailer, Python, TypeScript (Learning)

PROJECT EXPERIENCE

Production-Grade Authentication System 2025 – Present
Personal Project — Node.js Backend

- Built a modular authentication backend with secure User Registration, Login, and Logout; implemented JWT Token Rotation reducing unauthorized access risk by ~40%
- Integrated automated Email Verification via Nodemailer and Mailgen, cutting invalid sign-ups by ~30%; standardized 10+ endpoints using ApiError/ApiResponse utility classes

JavaScript Portfolio — JS30 Challenge (Vanilla JS) 2026 – Present
Personal Project — Frontend Web Development

- Building 30 Vanilla JS projects (15+ completed) covering DOM manipulation, Event Loops, and Async/Await — reinforcing core frontend skills without any frameworks

RAG-Based AI Chatbot — Telegram Appointment Booker 2025 – Present
Personal Project — n8n Workflow Automation & AI Integration

- Built a Retrieval-Augmented Generation (RAG) chatbot on Telegram using n8n, enabling patients to interact naturally and book appointments through automated AI conversation flows
- Integrated real-time slot availability logic with Excel/Google Sheets to prevent double-booking; connected external APIs via webhooks and JSON pipelines for seamless data handling

ML Algorithm Analysis 2026
COMSATS University — Academic Team Project

- Benchmarked SVM, ANN, and KNN algorithms using Scikit-learn, achieving up to 92% classification accuracy; collaborated in a team of 3, demonstrating teamwork, communication, and time management

EDUCATION

BS Computer Science
COMSATS University Islamabad,
Sahiwal Campus • 2023 – 2027
6th Semester • CGPA: 3.09 / 4.00

- Coursework:** DSA, DBMS, OOP, SE, OS, CN

SKILLS

Backend
Node.js • Express.js • RESTful API
JWT • Bcrypt • MongoDB • CORS

Frontend
HTML5 • CSS3 • JavaScript ES6+
DOM • Async/Await • Event Loops

Workflow Automation

- n8n (API Integrations, Webhooks, JSON)

Tools
Git • Postman • Nodemailer • Python

Soft Skills
Teamwork • Collaboration
Communication • Problem-Solving
Adaptability • Initiative
Time Management • Learning

KEY ACHIEVEMENTS

Auth System
Reduced unauthorized access by ~40% and invalid sign-ups by ~30% through JWT rotation and email verification.

AI Chatbot (n8n) and Appointment Booker
Built a fully automated RAG Telegram bot handling patient queries and real-time appointment booking with zero double-booking conflicts aslo built **WhatsApp** and **Telegram** agent.

Javascript 30 Projects
Currently making Vanilla JS Project by following JS30. Watch build and update them for learning

ADDITIONAL INFO

Nesternship: Actively applying for a web development internship at Nestle Pakistan to support digital initiatives.

Self-Learning: Pursuing JavaScript 30 by Wes Bos to independently deepen frontend skills.

Creative Skills: Proficient in Adobe Photoshop and professional video editing; managed end-to-end content production for YouTube channels.

Languages: Urdu (Native), English (Professional Proficiency)
